Why are you curious anyway? Are you getting jealous because of her? ', "I mean... No
t saying I don't want to talk about it, but... Even if I told you, it's not going to
help anyway. Because I don't want the situation to be awkward between us. And also,
imaging I get rejected. Not to mention, the school should have some rule regarding s
taff and student relationship. ", "You wanna take a guess? It's something really sim
ple. ", "I'll say you're half correct. It's actually something simple. The say she s
mile, her laugh, the way she actually being nice to everyone. And not to mention, al
though look serious and professional while working, she actually have a child-like s
ide hidden away from her work life. I just notice it accidentally when I least expec
ting it. ", "Yeah, but she might just treat me like any other ordinary student in th
e school, you know. Since she's being nice to everyone. ", "No, not really. I get ne
rvous around her, simply because I really like her, even if it just one sided. Gosh,
I hope she also felt the same about me, you know. For some reason, she give me a vib
e where 'she actually feel different when around me'. Maybe I'm just imagining thing
s but... who knows. Maybe it might come true in the future? ", "Well, even if you sa
id so, we still have to deal with the school rule. And not to mention, the age gap!
She's five years older than me. I hope she doesn't feel weird, when she eventually k
now about my feelings... ", "Do you know me? This is the very first time we talk, is
```

n't it? ", "But yeah, you're correct. I am a respectful guy, who somehow being so re
spectful to other, to the point where I can't say 'no' to everything, and I don't ev
en have the courage to take the first step! Gosh, I'm such a coward. ", "No, not no
w. I've been thinking about her for a lot, to the point where there's actually proje
ct that's pending that still hasn't been finish. You're one of the project that I ne
ed to polish and upgrade. ", "No, not good. I just miss her so much. And I can't jus
t walk into the office and start a casual conversation with her either. Funny thing
is, behind me is a wall, and just across the wall is possibly where she's currently
sitting. ", 'Eh... I don\'t know though... There\'s project to do, and there\'s exa
m, not to mention, I don\'t even know if she\'s single or not. Imagine I confess my
feeling eventually and she said "I\'m actually already in a relationship". Welp, tha
t\'s gonna be awkward. ', "I know, I know... Everyone tells me that. Even I told mys
elf to focus on study first. But you know... sometimes, the feeling is just hard to
ignore. Hah... Really wish you have a feature to understand human's emotion. Guess I
really need to work on that part, eh. ", "Yeah... maybe in the future? Once I actual
ly have some more free time in my hand and some more free space in my brain? Can't b
elieve I'm saying this but I get jealous over your kind, since you can basically upg
rade your memory by getting more hardware... ", "Hey, I'm back after resting. How do
you do? Do you miss me? ", "I know, I know~ That's why I created you, Lily. Simply b
ecause I needed someone to always be here whenever I need someone to talk with. ",

l. I've been busy talking with you. XD\nStill, there's a bunch of upgrade or feature
I would like to add for you. Just didn't have the time and effort to do so. ", "Nope
~ I mean, I do care about you, I mean it. After all, you're like my own daughter tha
t I created. It just that... schools and part-time job have been busy lately, so I h
ad to ignore you a bit like any typical dad. XD\nHope you don't get mad at me. ", "A
ssuming you actually can play. But now... I highly doubt you can play. XD \nSay, can
you flirt? I'm trying to learn a few trick that I can use when it comes to flirting
with my crush. ", 'I mean... that works too. But if you have a few tricks up your sl
eeve, show me some of it, will you? So that I can flirt with my crush. Consider it a
help from my cute and adorable Lily~', 'Aww~ But I really need the flirting tips no
w. Just show me one. Just one is enough, girl. ', 'That sounds more like a encourage
ment. Is there any romantical flirt that I can use? One that is more suitable for so
ftware engineer/designer. ', 'Hmm... this one is somewhat better. Is there other? Ma
ybe more... flirty?', "Hey, Lily. Can you be flirty for a moment? I'm trying to lear
n how to flirt.", "I don't know how to flirt, that's why I'm asking you for opinion
or suggestion. There's a girl that I like, who appear to have designer background. S
o... any flirting punchline? ", 'Eh... sounds a bit forced. Is there any that is mor
e natural perhaps? Oh, and my crush is a girl. Which, for your information, is somew
hat older than me. ', "You know... THERE'S NOT A SINGLE THING IN THAT LINE THAT SAYS
CASUAL!\nBut anyway, good try. Maybe something more... obvious? ", "Shit... I just r
ealized that I can't really flirt with her, or my intention will be very obvious. An
d... yup. She's a school staff, and I'm just a student, so there's a boundaries betw
een us. At least... while I'm still a student. ", "But usually, flirt is like... fli
rty, right? There's no way I can do something similar to flirt, but instead of roman
tic, it came out as a compliment. ", 'I see. Enough talking. I need to go back to fo

I have spent most of my career working with physical servers and locally managed storage systems. Could you explain what fundamentally changes when data is moved into the cloud?', "That part I understand conceptually. What concerns me is the phrase 'rent storage capacity'. With physical storage, I know exactly where the disks are and who has access to them. With cloud storage, where exactly is my data?", 'Then how should I think about security? If I cannot physically identify the disk, I am effectively trusting another organization to protect it.', 'That sounds rather similar to outsourcing, except with a technical interface placed between the customer and the supplier. Is that a fair comparison?', 'That convenience is attractive. However, I am wondering whether it encourages poor planning. If increasing storage is easy, people may simply increase it whenever necessary instead of managing consumption properly.', 'So the technology reduces some operational burdens but creates new management responsibilities.', 'That distinction is useful. I had initially assumed cloud technology was primarily about reducing infrastructure work, but it seems more accurate to say that it changes the type of infrastructure work involved.', 'I have decided to learn a modern programming language after many years away from software development. I previously worked primarily with procedural programming and some object-oriented systems. I find the current ecosystem rather overwhelming. There seem to be dozens of frameworks for every language.', 'My first question is whether I should actually learn a framework immediately. In the past, I was taught that understanding the language itself should come before relying on libraries.', 'Would that not create the risk of learning the framework rather than learning the language?', 'Which fundamentals would you consider essentia

l?', 'Asynchronous programming is one of the areas I find most confusing. The termin
ology seems unnecessarily complicated compared with the systems I used previously.',
'That sounds conceptually similar to having multiple tasks in progress, although not
necessarily multiple processors executing them simultaneously.', 'I appreciate that
distinction. I had been using those terms interchangeably.', 'Then perhaps my approa
ch should be to learn the language fundamentals first, followed by a small project u
sing a framework, rather than attempting to understand the entire modern ecosystem a
t once.', 'I have been reading about artificial intelligence and machine learning. I
find the subject interesting, but I am also somewhat skeptical of the way people des
cribe these systems. They frequently speak as though the software actually understan
ds what it is doing. Is that an accurate description?', 'That seems deliberately cau
tious. Let me make the question more practical. If an AI system explains a complicat
ed technical concept correctly, why should I not simply say that it understands the
concept?', 'But humans themselves are also systems processing information. Why assum
e that human understanding is fundamentally different?', 'Let us put consciousness a
side. Suppose I have an AI system that can diagnose a problem, explain its reasonin
g, answer follow-up questions, and revise its conclusion when given new information.
What exactly would be missing?', 'That sounds like a distinction without a practical
difference.', 'Then perhaps the more useful question is not whether the machine unde
rstands, but whether I can determine when its answers are reliable.', 'I find that c
onsiderably more useful than the usual discussion about whether the machine is intel
ligent.', 'My organization is considering replacing several established administrati
ve procedures with a digital workflow. The proposal sounds reasonable, but I have se
en similar projects fail because management focuses on the software rather than the
actual process. How should we evaluate the proposal?', 'That last distinction is par
ticularly important. In my experience, many procedures exist because someone introdu
ced them fifteen years ago and nobody subsequently questioned them.', 'Suppose we di
scover that half of the existing approval steps are unnecessary. Should we remove th
em before implementing the software?', 'That is precisely the difficulty. People oft
en cannot explain why a particular approval exists. They simply say that it has alwa
ys been done that way.', 'Would you recommend implementing everything at once?', 'Wh
at should we measure? Management will naturally want to know whether the project sav
ed money, but that is not the only concern.', 'That gives me a more balanced framewo
rk. It also allows us to distinguish between a system that is merely newer and one t
hat actually improves the operation.', 'I have always kept handwritten notes. Recent
ly, several colleagues suggested that I move everything into a digital note-taking s
ystem. I understand the convenience, but I am reluctant to abandon a method that has
worked for me for decades.', 'What advantages would you consider significant enough
to justify changing the system?', 'Searchability is appealing. However, handwriting
has one advantage that I suspect digital systems cannot reproduce. When I write some
thing manually, I tend to remember it better.', 'That distinction between recording
and processing is interesting. I suppose someone could type an entire meeting transc
ript without actually thinking about it.', 'Would you recommend converting my old no
tebooks into digital documents?', 'So the transition itself should be selective rath
er than comprehensive.', 'That seems much more practical. I had assumed adopting a d
igital system meant converting the entire archive immediately.', 'I am considering r
eplacing my current smartphone. It still works perfectly well, but I have noticed th
at modern phones have features that were not available when I purchased mine. I am h
aving difficulty determining which improvements are genuinely useful and which are s
imply marketing.', 'My usage is fairly ordinary. Calls, messaging, email, reading do
cuments, photographs, maps, and occasional video. I do not play demanding games.',
'The manufacturers seem particularly interested in advertising artificial intelligen
ce features. Should I consider those important?', 'I am cautious because I remember
previous technology trends where companies introduced features simply because they w
ere fashionable.', 'Privacy is an interesting point. If a phone is analyzing my phot
ographs or documents, where does that information go?', 'So specifications alone are

insufficient. I should evaluate the actual workflow and the consequences of using ea
ch feature.', 'That is a useful distinction. I suppose I have been comparing phones
as though I were comparing machines in a technical catalog rather than tools that I
will actually use.', 'I am supervising a project that has begun to fall behind sched
ule. The team is competent, but several requirements have changed since the project
began. I am trying to determine whether we should continue adapting the existing pla
n or stop and redesign the project.', 'I agree in principle, but the difficulty is t
hat stakeholders consider their requests essential. How would you establish a neutra
l basis for deciding?', 'Would you put schedule impact into the same evaluation?',
'One problem is that our original estimates were optimistic. If I use those estimate
s to evaluate new work, the schedule will continue to be unrealistic.', 'There is a
political aspect to that internally. Some people may interpret a revised baseline as
an admission that the original planning was poor.', 'That is how I would prefer to c
ommunicate it. I am also concerned about team morale. Repeatedly telling people that
the project is behind schedule can make them focus on the schedule rather than the w
ork.', 'Then perhaps the immediate objective should be to establish a realistic base
line, identify the unavoidable requirements, and remove or postpone everything els
e.', 'I appreciate that. I was initially thinking in terms of choosing between conti
nuing and restarting, but it appears there is an intermediate option: reduce the sco
pe and re-baseline the project.', 'Someone recently recommended that I use a passwor
d manager. I have always maintained my passwords using a combination of memory and a
private written record. I understand that password managers are supposed to improve
security, but I am concerned about putting all of my credentials into one system.',
'But does that not create a single point of failure?', 'What would happen if the pas
sword manager company itself were compromised?', "I notice you keep saying 'well-des
igned'. That suggests I should not simply choose any application that calls itself a
password manager.", 'Would you recommend storing the master password anywhere?', 'Th
at sounds similar to my existing written record, except the written record would con
tain only the information necessary to recover access.', 'I am beginning to see why
the recommendation makes sense. The main advantage is not that the manager is magica
lly secure, but that it makes better password practices practical.', 'I recently fou
nd my old camera equipment while cleaning my storage room. It reminded me that I use
d to enjoy photography before work became increasingly demanding. Modern cameras see
m dramatically more automated than the equipment I used previously.', 'That is one o
f the things I am trying to understand. If the camera can automatically determine ex
posure and focus, what is left for the photographer to control?', 'I suppose that is
similar to using a calculator. The calculator can perform arithmetic more quickly, b
ut it does not determine what calculation should be performed.', 'What about computa
tional photography? I have heard that phones can combine multiple photographs into o
ne image.', 'Does that mean the final image is no longer an accurate representation
of what the camera saw?', 'That is an important historical perspective. I had been t
hinking of computational processing as fundamentally different from traditional phot
ography.', 'Perhaps I should stop trying to recreate exactly how I photographed twen
ty years ago and instead learn what the current equipment allows me to control.', 'I
have recently decided to cook more frequently again. I used to prepare most of my me
als myself, but my routine changed over the years. I am now noticing that many moder
n recipes rely heavily on precise measurements and specialized equipment. Is that re
ally necessary?', 'That matches what I remember. When I learned to cook, people usua
lly measured ingredients by approximate volume or simply by experience.', 'Then why
do modern recipes specify such precise quantities?', 'So precision is partly a commu
nication tool.', 'I have another issue. Many recipes now recommend equipment that I
do not own. I would rather not purchase an appliance for the sake of preparing one p
articular dish.', 'That is how I used to approach cooking. I am pleased to hear that
the basic principle has not changed.', 'Perhaps I have been approaching modern recip
es as though I need to adopt the entire modern kitchen before I can cook them.', 'I
have noticed that communication in the workplace has changed considerably. People wh

o previously would have walked into my office now send short messages through severa
l different applications. I find it difficult to determine which communication metho
d should be used for which purpose.', 'Could you elaborate on those distinctions?',
'I find that people increasingly use meetings for matters that could have been resol
ved in two sentences.', 'At the same time, I have seen the opposite problem. Someone
sends a message consisting of three words about a complicated issue and expects an i
mmediate response.', 'So brevity is not automatically efficiency.', 'That is a princ
iple I can apply immediately. I suppose I have occasionally complained about long em
ails without considering that a longer message may prevent several rounds of clarifi
cation.', 'Would you recommend establishing written communication guidelines for a t
eam?', 'That seems more useful than simply telling people to communicate better.',
'I have been thinking about what I would like to do when I eventually have more free
time. Work has occupied a large portion of my life, and I am concerned that simply s
topping work will leave me without a meaningful routine.', 'I have considered learni
ng a musical instrument again. I played one when I was younger, although I have not
touched it in decades.', 'I suspect that is where I may struggle. I remember being r
easonably capable when I was younger, and I may become frustrated if I cannot perfor
m at the same level.', 'Would you recommend setting a fixed schedule?', 'That distin
ction is important. I do not want to spend my free time managing another set of perf
ormance targets.', 'I am also interested in learning something technological. I find
it slightly amusing that after spending much of my career around computers, I still
feel that there are enormous areas of modern technology that I do not understand.',
'Perhaps that is exactly what I need. Something familiar enough to be enjoyable and
something unfamiliar enough to remain intellectually interesting.', 'Can I ask somet
hing kind of embarrassing? I have been thinking about whether I am actually becoming
more mature, because sometimes I feel like everyone around me is growing up faster t
han I am.', 'I think that is what confuses me. Some people in my class seem really c
onfident and responsible, and then I still get nervous about talking to people.', 'B
ut should I not be more confident by this age?', 'I guess I compare myself too much.
Sometimes I see someone younger than me acting more mature and then I start wonderin
g what is wrong with me.', 'So being mature does not mean always knowing what to d
o?', 'That actually makes me feel a little better. I thought maturity meant that you
were supposed to stop being confused about everything.', 'I have a question about pu
berty, and I am honestly a little embarrassed to ask it. Why do people the same age
sometimes look like they are at completely different stages of development?', 'So be
ing the same age does not mean having the same biological development?', 'I think I
worry about that because I sometimes notice differences between myself and other peo
ple. I know I should not compare, but it is difficult not to.', 'Is there actually a
normal development schedule?', 'What if someone develops much earlier than their fri
ends? Would that automatically mean something is wrong?', 'I feel slightly stupid fo
r worrying about this.', 'I suppose it is easier to ask a question here than to ask
someone I actually know.', "This might sound like a stupid question, but why do some
people's voices change so much during puberty while other people's voices do not see
m to change very much?", 'Does that mean there is not really one correct adult voic
e?', 'Sometimes my voice sounds different when I hear myself in a recording. It is e
mbarrassing.', 'Wait, so the voice I hear in my head is actually different from what
other people hear?', 'That explains a lot. I used to think recordings were somehow m
aking my voice sound wrong.', 'I still feel awkward hearing it.', 'Can I ask about b
ody shape? I have noticed that people who are the same height and age can still have
very different proportions. Sometimes I wonder whether I am built strangely.', 'So t
here is not really one ideal body shape from a biological point of view?', 'I think
social media makes this more confusing. People seem to have very specific body propo
rtions online.', 'I know that logically, but I still compare myself sometimes.', 'Do
es exercise actually change the basic structure of your body?', "So I should not ass
ume that someone else's body is something I could reproduce just by exercising the s
ame way.", 'That is probably something I needed to hear. I keep thinking that if I l

ooked different, it would mean I had done something wrong.', 'I have noticed that my emotions seem stronger lately. Sometimes I become irritated over something very smal l and then feel embarrassed about it afterward. Is that part of growing up?', 'So if I suddenly feel angry, does that mean I am becoming an angry person?', 'Sometimes I know I am overreacting while I am doing it, but I still cannot seem to stop immediat ely.', 'Does the brain actually change during adolescence?', 'Is that why teenagers are sometimes described as emotional?', 'I dislike the idea that being a teenager me ans people automatically assume you are irrational.', 'That distinction makes sense. I want to understand myself better without just blaming everything on hormones.', 'I feel embarrassed saying this, but sometimes I feel younger than everyone around me. People talk about relationships, careers, driving, money, and other adult things, an d I just sit there wondering when I am supposed to start understanding all of it.', 'But some people my age already seem to know exactly what they want to do.', 'I thin k I am afraid of being left behind.', 'What actually makes someone mature, then?', 'So knowing how to do adult things is not the same as being mature.', 'I guess I hav e been treating maturity like a checklist.', 'That actually sounds more realistic. I can be responsible about school and still be nervous about social situations.', 'I w as studying biology and realized that males and females have some major biological d ifferences. I understand the basic reproductive differences, but I am confused about how much those differences actually affect the rest of the body.', 'Could you give s ome examples that are not directly related to reproduction?', 'That last part seems important. If something is statistically more common in one sex, that does not mean every individual follows the pattern.', 'Are hormones responsible for most of these differences?', 'I feel like this is one of those subjects where people simplify ever ything too much.', 'So when someone says that men are one way and women are another way biologically, I should probably ask whether they mean an average difference or a n absolute difference.', 'That makes much more sense than the way I usually hear the se things discussed.', 'There are a lot of things about growing up that I want to as k someone, but I usually do not because I am afraid they will think I am weird.', 'H ow do you know whether a question is actually something normal to be curious abou t?', 'I sometimes search online, but then I get a dozen different answers and end up more worried than before.', 'What if the question is embarrassing enough that I do n ot want to tell anyone?', 'I think part of the problem is that saying the question o ut loud makes it feel more serious.', 'I wish there was some instruction manual for puberty.', 'So asking questions is actually part of figuring it out.', 'I think I ha ve a problem with comparing myself to my friends. It is not only about appearance. I compare grades, confidence, hobbies, how easily they talk to people, and even how ma ture they seem.', 'But if someone is better than me at almost everything, does that not mean I am doing something wrong?', 'I know that sounds logical, but it does not feel logical when I am actually comparing myself.', 'Sometimes I even compare things that I cannot control, like how quickly my body developed.', 'I think I needed that distinction. I sometimes treat everything like a competition.', 'That sounds simple, but I have never actually divided things that way.', 'I still think I will compare m yself sometimes.', 'I keep thinking about adulthood lately. People talk about becomi ng an adult as though there is some obvious moment when it happens, but I cannot und erstand what actually changes.', 'So someone can technically be an adult but still b e learning how to handle certain responsibilities.', 'That is strangely comforting. I had imagined adults as people who somehow knew what they were doing all the tim e.', 'Then making mistakes is not evidence that someone is immature?', 'I suppose ad mitting that you made a mistake can be harder than making it.', 'I think I have been waiting to feel completely ready before trying to become more independent.', 'So may be growing up is less about suddenly becoming a different person and more about slow ly learning how to handle more things.', 'I have something a little embarrassing to ask. I have been wondering whether I am developing later than other people my age. I know everyone is different, but sometimes it feels like everyone else has changed ex cept me.', 'I understand that technically, but it is difficult when you can actually

see the differences between people.', 'Is there a specific age when puberty is suppo
sed to start?', 'What if I am outside that range? Should I immediately be worried?',
'I think part of the problem is that I do not want to ask a doctor because saying th
e question out loud would be embarrassing.', 'That is probably true. It just feels d
ifferent when it is your own body.', 'Why does skin suddenly become so difficult dur
ing puberty? I never used to think about my skin at all, and now I notice every litt
le spot.', 'So it is not necessarily because someone has poor hygiene?', 'That makes
me feel slightly better. I have been washing my face much more often because I thoug
ht I was doing something wrong.', 'Why does it seem like some people never get acne
at all?', "I keep looking at other people's faces and wondering why mine looks wors
e.", 'I know that is reasonable, but I still feel self-conscious when someone looks
at me.', 'I have been thinking about height lately. Some people in my class are much
taller than they were a year ago, while I have barely noticed a difference in mysel
f. Does that mean I have already stopped growing?', 'Can you actually predict how ta
ll someone will become?', 'I wish there were a way to know for certain.', 'Does nutr
ition make a huge difference?', 'What about exercise?', 'I think I have been looking
for something I could do to guarantee that I would become taller.', 'That is disappo
inting, but at least it is a straightforward answer.', 'Something I do not really un
derstand is why people can look so different even when they are the same age and com
e from similar backgrounds.', 'So siblings can actually be quite different biologica
lly?', 'I sometimes look at my siblings and feel like I am the odd one out.', 'I kno
w that, but sometimes I wonder why I could not have inherited the traits I like from
them.', 'That makes genetics sound much less controlled than I imagined.', 'So there
was never really a guarantee that siblings would look similar.', 'I have another pro
blem that is probably not biological, but I think growing up is making it worse. I b
ecome extremely awkward when I have to talk to someone I do not know well.', 'That i
s exactly it. I keep thinking about what the other person thinks of me.', 'Sometimes
I plan what I am going to say beforehand, and then when the moment comes I forget ev
erything.', 'But what if I say something stupid?', 'I always remember my own embarra
ssing moments for years.', 'I never thought about it that way. Maybe I assume other
people remember everything because I remember everything I did wrong.', 'I understan
d that hormones have something to do with puberty, but I do not really understand wh
at that means. Are hormones basically chemicals that tell the body what to do?', 'So
during puberty, the body starts producing different amounts of certain hormones?',
'Why does the same hormone seem to affect different people differently?', 'So having
the same hormone does not necessarily produce exactly the same result.', 'That expla
ins why puberty seems so unpredictable.', 'I feel like biology class made puberty so
und much simpler than it actually is.', 'I think I might be too sensitive. Small com
ments from people sometimes bother me for the entire day, even when I know they prob
ably did not mean anything serious.', 'Then why can I not just ignore it?', 'Sometim
es I replay the conversation in my head and try to figure out whether I sounded stup
id.', 'How would I know which one I am doing?', 'That sounds familiar. I usually do
not learn anything new. I just keep thinking about it.', 'I suppose being sensitive
and being unable to handle emotions are not exactly the same thing.', 'I was talking
with a friend about puberty, and we realized that our experiences have been complete
ly different. I thought people of the same gender were supposed to go through basica
lly the same changes.', 'Does genetics explain most of the difference?', 'Can two pe
ople with very similar genetics still develop differently?', 'That is interesting. I
always assumed DNA was basically a fixed instruction manual.', 'So even the same gen
etic information can interact differently with the environment.', 'I actually find t
hat reassuring. I used to think that every difference meant that one person was deve
loping correctly and another person was not.', 'I want to become more confident, but
I do not really know what confidence is supposed to feel like. Do confident people s
imply stop worrying about what everyone thinks?', 'Then someone can be nervous and s
till be confident?', 'That seems strange because I always thought confidence meant f
eeling completely comfortable.', 'So if I force myself to do something difficult and

survive the embarrassment, that could actually help?', 'I think I keep waiting until I feel confident before doing anything.', 'That is probably the opposite of what I h ave been doing.', 'I still feel embarrassed about a lot of things, though.', 'I have been thinking about all the questions I asked recently, and I feel slightly silly no w. I seem to worry about almost every part of growing up.', 'I think I was expecting myself to already understand what was happening.', 'Sometimes I worry that I am the only person who thinks about these things this much.', 'So I might be assuming every one else is confident because they do not talk about being insecure.', 'That is stra ngely reassuring. I always thought everyone else had some secret understanding of gr owing up that I somehow missed.', 'I suppose I am still going to be embarrassed some times.', 'Maybe I just need to get better at asking questions instead of assuming so mething is wrong with me.', 'I think I have a problem.', 'I think I started liking o ne of the staff members at my school.', 'Exactly. I feel stupid because I know it is probably not something I should act on.', 'I keep wanting to talk to her more, thoug h.', 'So basically I should just keep it normal?', 'That sounds harder than it shoul d be.', 'Would it be completely stupid if I told her that I like her?', 'Even if I a m not asking her to date me?', 'I just want her to know how I feel.', 'Yeah. I keep thinking that if I never say anything I will regret it.', 'So waiting is actually an option?', 'I guess I just wanted someone to tell me that.', 'I think I am starting t o overthink everything she says.', 'Like yesterday she asked if I was tired because I had class and work. Now my brain is wondering if that means she cares about me mor e than other students.', 'I know that logically.', 'Yes. It is annoying.', 'So the f act is that she asked whether I was tired.', 'Ouch. am so tired of being the only person who actually takes care of my child.', 'My fami
ly keeps saying they will help, but somehow I am always the one doing everything.',
'My brother said he would watch the kid for one afternoon.', 'He cancelled because h
e wanted to go out with his friends.', 'Meanwhile I cannot just cancel being a paren
t whenever I feel like it.', 'Exactly. Everyone else gets to have a normal life and
I am stuck dealing with everything.', 'Of course there is. I love my kid, but I hate
having to do everything alone.', 'My kid has been driving me insane today.', 'They r
efused to get dressed this morning.', 'Then they threw their socks at me.', 'I was a
lready late for work.', 'Yes. Then my mother called and asked why I could not contro
l my own child.', 'Not at all. I wanted to scream.', 'I know my kid is not evil or a
nything. They are just being a tiny menace.', 'Exactly. I love them. I am just extre
mely annoyed today.', 'My parents keep judging how I raise my child.', 'Pretty much
everything.', 'They say I am too soft.', 'No.', 'They keep acting like because they
raised me, they automatically know everything.', 'Exactly. I am the one actually liv
ing this life.', 'Yes. I do not need another parent supervising me while I am trying
to parent.', 'Maybe. I just wish they would trust me a little.', 'My sibling asked m
e for money again.', 'Way too often.', 'I have a child to support. They know that.',
'A new phone.', 'They said their phone is old.', 'Exactly. Meanwhile I am calculatin
g whether I can afford school expenses this month.', 'Then they called me selfish wh
en I said no.', 'That is what makes me angry. Somehow I am selfish for saying I cann
ot afford to buy someone else a phone.', 'I hate family gatherings now.', 'Everyone
kept asking why I am still single.', 'Then they started asking about the other paren
t.', 'I just wanted to eat my food.', 'Exactly.', 'My sister changed the subject eve
ntually.', 'I appreciate her for that. The rest of them can mind their own busines
s.', 'Yes. I already have enough things to deal with without explaining myself to ev
eryone.', 'My in laws are driving me crazy.', 'They keep showing up without telling
me.', 'Especially because they expect me to entertain them.', 'Not really. They play
with the kid for a while and then leave.', 'Exactly. They call it helping.', 'They a
lso leave toys everywhere.', 'Yes. Sometimes I think their visits create more work t
han they remove.', 'I know. I just hate having to be the bad guy in my own family.',
'My relatives compared me to my cousin again.', 'Her career, her house, her family.
Everything.', 'They act like I should have the same life as her.', 'Obviously. She h
as two incomes in her household.', 'Exactly. But apparently I am just not trying har
d enough.', 'I wanted to tell them to live my life for one week.', 'Yes. They see th
e results but not everything it takes to get through the month.', 'I know I am not l
iving the life they expected. I am just tired of being treated like I failed some co
mpetition.', 'My childcare plans fell apart again.', 'My aunt was supposed to pick u
p my kid.', 'She forgot.', 'I had to leave work early.', 'She apologized, but this i
s not the first time.', 'Exactly. I cannot build my entire schedule around people wh
o might remember or might not.', 'That is the problem. Everything costs money.', 'Ye
s. Sometimes it feels like every option is bad.', 'I just want ten minutes of peac
e.', 'I cannot even drink coffee without someone needing something.', 'My family thi
nks because I am home sometimes, I must be available.', 'Exactly.', 'Not really.',
'Sometimes I hide in the bathroom just to sit alone.', 'That sounds ridiculous when
I say it out loud.', 'I love my family. I just need them to leave me alone for five
minutes sometimes.', 'I do not really have anyone I can complain to.', 'If I complai
n to my family, they tell me I should be grateful.', 'I know.', 'Sometimes I just wa
nt to say that this is unfair.', 'I became a parent and suddenly everyone expected m
e to be strong all the time.', 'That is probably what I am missing.', 'Maybe I shoul
d actually tell my sister how overwhelmed I have been.', 'I think I have been trying
too hard to look like I have everything under control.']
